

Hi Year 5,

We hope you are all keeping safe and well and staying inside.

Here are some activities to keep you busy over the week or two:

General:

Make sure you logon to <https://kids.classroomsecrets.co.uk> using the login details provided in your home learning pack.

There are lots of Maths, Reading and EGPS activities on there and more are being added all of the time. They are interactive and will let you know straight away if your answers are correct.

English:

Write a letter to someone you admire. This could be someone in your family (who you maybe can't visit right now) or it could be someone famous who does something you think is very special.

Tell the person what it is you admire about them and why. Give examples of things they have done or said that show that they are special.

If it is someone you don't know very well, tell them about yourself and how you might be aiming to do something similar to them.

Use at least two fronted adverbials and for extra challenge, try using a relative clause.

Maths:

Visit <https://whiterosemaths.com/homelearning/year-5> and click on Week 1. There are five lessons on decimals for you to work through on there. The answers are even provided for you to check your work.

Science:

THE BIG QUESTION

What sport makes you sweat most?

Before you start, think about these things:

- Why do we sweat?
- How much do we sweat?
- What makes us sweat more or less?

Think about how you could investigate this.

Which variables will you change and which will you keep the same to make your investigation fair?

e.g. the amount of time spent on each thing, the type of exercise, the shoes/clothes you wear, the amount of water you drink.
